	Otago University (afternoon information sessions only): Applied Science, Arts, Commerce, Entrepreneurship, Health Science, Music, Performing Arts, Pharmaceutical Science, Science, Biomedical Science, Law, Surveying

Questions you could ask...

When you're thinking about doing a study or training programme, you'll have lots of questions for education providers. Asking providers questions is a good way to help you decide if a study or training programme is right for you, so don't be afraid to ask them.

- 1. How much of the programme is hands-on and how much is in the classroom?** If you like hands-on learning, a programme that's mostly classroom-based learning might not be for you.
- 2. Will the programme help me get into work?** Some providers arrange work-based training to help ākonga into work.
- 3. Will I have choices about the subjects I study?** Most programmes have core subjects you must study and allow you to choose between others.
- 4. What do I need to do to get into the programme?** You may need to meet entry requirements to get into your programme, like showing you have relevant work experience, attending an interview or submitting a portfolio. You can ask for tips on how to meet them.
- 5. When do I need to apply?** Some programmes have closing dates – it's important to know when these are, to apply in time.
- 6. Where can I stay while I study or train?** If you need to live away from home, ask about accommodation options on campus and the cost, how easy it is to get in, how to apply, and when.
- 7. What kind of pastoral care do you offer?** Pastoral care includes services to support ākonga health and well-being, like gyms, health services, counselling and guidance.
- 8. If relevant: what support can you offer for my impairment or condition?** Providers may offer advice and support to help you fully participate, like adaptive technology, accessible test facilities and mobility parking.
- 9. What kind of social activities are there?** Providers may have groups you can join, like sports, special interests, LGBTI+, career development, or networking.
- 10. Are you having an Open Day?**
Some providers invite future students and whānau on campus
